

# Fan Blade Label Decoder

- The environment will damage a fan blade label so that it's no longer legible.
- No two labels will be alike - OEM's have their own requirements for what information must be included on their supplier's labels.

Hopefully you'll find the following examples helpful when attempting to source a condenser fan blade replacement.

22" Diameter • 13 Degree Pitch • .500 Bore • Clockwise (CW) Rotation

26" Diameter • 26 Degree Pitch • .500 Bore • Counter Clockwise (CCW) Rotation

20" Diameter • 28 Degree Pitch • Clockwise (CW) Rotation

27.6" Diameter • .17 Degree Pitch • Counter Clockwise (CCW) Rotation

24" Diameter • 3 blade • 22 Degree Pitch

28 Degree Pitch

When you have the specs for the Fan Blade that you're replacing then contact your preferred distributor or wholesaler for price and availability

An OEM will often qualify multiple fans for each application even though they will only use 1 for production. If you cannot source the exact part that you're replacing then Revcor will be pleased to help you identify a like part that was qualified by the OEM.
